

# KKL Luzern

The Culture and Convention Centre Lucerne (KKL Luzern) is undoubtedly one of the most spectacular buildings in Switzerland today. Situated directly on the shores of Lake Lucerne its architectural brilliance shines far beyond the country's borders, lending the city of Lucerne a distinctive new landmark.

The KKL Luzern was designed by French architect Jean Nouvel, and is located in the city centre, only a few yards from the main railway station. The concert hall, by American acoustics engineer Russell Johnson, has inspired many an orchestra to outstanding performances and delighted concert audiences with its unique acoustics.

Beneath the sweeping roof of the KKL Luzern concerts, conferences and culinary experiences combine into a complete work of art, staged solely to delight the senses and the discerning guest.
